# iEdison

## Version 4.13.4.1

## Release Notes

### New Features

#### ***New Notification Message 180 Added to iEdison***

The notification message 180, *Missing Research Tools Agreement*, is produced when the following conditions are met:

1. An Extramural Invention Report's (EIR's) status is as follows: *Licensed as an Unpatented Biological Material or Research Tool*.
2. The user has not accepted the Research Tools Agreement.
3. The system date is greater than the **Invention Disclosure Date** plus 30 days.

The message is cleared if any of the following conditions occur:

1. The Research Tools Agreement is accepted or the Invention Report's status is changed.
2. The **Invention Disclosure Date** is changed before the 30 day time limit.

#### ***Users can now Save a Child EIR with a filed Utilization Report on a Parent EIR***

A Child EIR with a filed Utilization Report can now be saved on a Parent EIR.

### Fixes

#### ***Message 260 Deleted for Patents not in Institution Retains Rights State***

Previously the message 260 for provisional patents due to expire was produced erroneously for patents that were not in states where the Institution retains rights.

This issue is resolved.
